

## General Information

Always keep your guitar in its case when not in use. Avoid rapid temperature changes. If you bring your guitar from a cold area into a warm area leave it in its case, to change temperature slowly, because cracking of the finish or wood can occur, so do not leave it in extreme hot or cold environments.

## Cleaning

Care must be taken when cleaning the instrument. Do not use spray polish directly, but spray onto a soft cloth then use this to polish the instrument. This procedure will stop any polish getting onto the strings which would damage the strings and the sound quality. A warm damp cloth can be used to get rid of stubborn marks.

It is important to let the teacher tune the instrument. The teacher will let you know when you are able to tune the instrument yourself.

If you encounter any problems with your instrument seek advice from the Music Centre or your child's instrument teacher.
